Participating Countries:
Antigua and Barbuda, The Bahamas, Barbados, Dominica, Dominican Republic, Grenada, Haiti, Jamaica, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines and Trinidad and Tobago.

Objectives:
Promote sustainable energy in the countries of the Caribbean region as an essential component of sustainable development that address the challenge of climate change.

Overview:
This project proposes to address critical commercialization challenges related to renewable energy technologies and energy efficiency alternatives within the energy portfolio in the region, as a means of injecting less environmentally harmful energy options.

The main actions of this project are:

1. Regional workshops to promote sustainable energy projects (renewable energy and energy efficiency)

2. Funding to support requests for cooperation to promote the development of sustainable energy projects. Key themes likely to be addressed include securing and evaluating technical proposals, project contracting and support project financing.

3. Educational program to teach energy basics and sensitize the use and development of sustainable energy among school children in the Dominican Republic.

Implementing Partners:
Organization of American States

Financing:
Government of the United States
